Documentation architecture and ADRs

0.1 Manual volumes in this release

PDF	Description
00-Trainers-Manual.pdf	Field teaching handbook for instructors and pilot collaborators
01-Specifications.pdf	Identity framework, blueprint, design principles, notation standards
02-Reference.pdf	Concept library, technique, grids, sound model
03-User-Guides.pdf	Instructor, pilot, arranging, and educational guidance

PDF	Description
04-Research.pdf	Indigenous percussion, Kaamulan, marching heritage
05-Architecture.pdf	Documentation architecture and ADRs
06-Governance.pdf	EDF governance, metadata, change management
07-AI-Development.pdf	AI-assisted workflow and project development notes
08-Templates-and-Placeholders.pdf	Templates and inactive EDF domain placeholders

1 Architecture

This domain contains structural decisions about the project, its documentation system, and major cross-cutting design choices.

1.1 Contents

- [Documentation Architecture](#)
- [Architecture Decision Records](#)

2 Documentation Architecture

2.1 Purpose

The Philippine Marching Percussion Fusion Project is intended to become more than a collection of scores. It is a documented educational, arranging, cultural, and performance system.

This document defines where information belongs so the project can grow without scattering knowledge across unrelated files.

2.2 Architectural Model

The repository uses the [Engineering Documentation Framework](#) as its baseline and extends it for a special-purpose music-education project.

```
.
Root navigation and governance
docs/                # Human-readable project documentation
scores/              # MuseScore and printable score deliverables
audio/               # Practice and presentation audio
references/          # Curated source material and links
assets/              # Project branding and shared visual assets
scripts/             # Project utilities and validation
reports/             # Generated reports
tasks/               # Active work tracking
archive/             # Superseded material
```

2.3 Root Document Responsibilities

2.3.1 [README.md](#)

Concise public landing page. It explains the project and directs readers to [PROJECT_INDEX.md](#).

2.3.2 [PROJECT_INDEX.md](#)

Authoritative navigation hub for all project documentation and deliverables.

2.3.3 [PROJECT_CHARTER.md](#)

Defines purpose, scope, stakeholders, constraints, and success criteria.

2.3.4 [Philippine Marching Percussion Identity Framework](#)

The project's musical constitution. Defines identity, cultural foundations, and the [Identity Preservation Checklist](#) (Trainers Manual).

2.3.5 [ENGINEERING_DOCUMENTATION_FRAMEWORK.md](#)

Records how EDF applies to this special-purpose project.

2.3.6 [ARCHITECTURE_DECISIONS.md](#)

Indexes project ADRs.

2.3.7 [CHANGELOG.md](#)

Records significant structural and documentation changes.

2.4 Documentation Domains

2.4.1 [docs/Architecture/](#)

Project structure, documentation architecture, cross-cutting design, and ADRs.

2.4.2 [docs/Specifications/](#)

Authoritative statements of project intent, required behavior, design constraints, notation rules, and musical requirements.

Primary documents:

- [Philippine Marching Percussion Identity Framework](#) — musical constitution
- [Core Blueprint](#) — operational blueprint
- [Design Principles](#)
- [Notation Standards](#)

2.4.3 [docs/Reference/](#)

Definitions, terminology, concept explanations, and stable reference material. See the [Concept Library](#) for mature concept definitions.

2.4.4 [docs/User_Guides/](#)

Practical instructions for arrangers, educators, performers, and other end users.

Primary documents:

- [Instructor Introduction](#) — first read for music educators and pilot collaborators
- [MONHS 2026 Pilot Brief](#) — Misamis Oriental National High School (MONHS) pilot
- [Educational Handbook](#) — teaching methodology
- [Arranging Guide](#) — arranging guidance

2.4.5 [docs/Development/](#)

Project-building workflow, experiments, internal working methods, and the [Project Journal](#).

2.4.6 [docs/Governance/](#)

Project-specific governance guidance when it becomes necessary.

2.4.7 [docs/Templates/](#)

Reusable document and teaching-material templates.

2.4.8 [docs/Research/](#)

Research notes, source evaluations, cultural studies, and analysis derived from external materials.

2.5 Deliverable Areas

2.5.1 [scores/](#)

MuseScore files, PDFs, and score-related documentation.

2.5.2 [audio/](#)

Full mixes, sectional practice tracks, and approved exports.

2.5.3 [references/](#)

Curated recordings, links, media notes, and inspiration sources. Large copyrighted media should not be committed unless redistribution is permitted.

2.5.4 [assets/](#)

Canonical project branding and shared visual assets (for example the primary logo). See [Assets README](#).

2.6 Information Lifecycle

1. [Research](#) or observation
2. [Development](#) note or [Project Journal](#)
3. [Concept Library](#) or [Specification](#)
4. [Arranging](#) or [educational](#) guidance

5. [Score](#) and [audio](#) deliverable
6. Field testing
7. Revision or [archival](#)

2.7 Placement Rules

- Vision and required outcomes belong in [Specifications](#).
- Stable definitions belong in [Reference](#).
- Practical how-to guidance belongs in [User Guides](#).
- Experiments and provisional observations belong in [Development](#).
- Structural decisions belong in [Architecture](#).
- External-source analysis belongs in [Research](#).
- Finished music belongs in [scores/](#).
- Finished practice audio belongs in [audio/](#).
- Canonical branding and shared visual assets belong in [assets/](#).
- Superseded material belongs in [archive/](#).

2.8 Navigation Rules

Every user-facing Markdown document should link upward through the documentation hierarchy. Domain README files provide local navigation, while [PROJECT_INDEX.md](#) remains the master index.

2.9 Migration Rule

Information should have one canonical home. During migration, old paths must be explicitly listed for removal after the replacement files have been verified.

3 Architecture Decision Records

Project-specific architectural decisions are stored here.

Use sequential names:

ADR-0001-Short-Decision-Title.md

ADR-0002-Short-Decision-Title.md

Update the root [Architecture Decision Index](#) whenever an ADR is added or changes status.
