Release: 2026.07

0.1 Manual volumes in this release

PDF	Description
00-Trainers-Manual.pdf	Field teaching handbook for instructors and pilot collaborators
01-Specifications.pdf	Identity framework, blueprint, design principles, notation standards
02-Reference.pdf	Concept library, technique, grids, sound model
03-User-Guides.pdf	Instructor, pilot, arranging, and educational guidance
04-Research.pdf	Indigenous percussion, Kaamulan, marching heritage
05-Architecture.pdf	Documentation architecture and ADRs
06-Governance.pdf	EDF governance, metadata, change management
07-AI-Development.pdf	AI-assisted workflow and project development notes
08-Templates-and-Placeholders.pdf	Templates and inactive EDF domain placeholders
09-Student-Practice-Guide.pdf	Student orientation and embedded technique reference

1 Architecture

This domain contains structural decisions about the project, its documentation system, and major cross-cutting design choices.

1.1 Contents

- [Documentation Architecture](#)
- [Architecture Decision Records](#)

2 Documentation Architecture

2.1 Purpose

The Philippine Marching Percussion Fusion Project is intended to become more than a collection of scores. It is a documented educational, arranging, cultural, and performance system.

This document defines where information belongs so the project can grow without scattering knowledge across unrelated files.

2.2 Architectural Model

The repository uses the Engineering Documentation Framework (*not included in PDF manual; see project repository*) as its baseline and extends it for a special-purpose music-education project.

```
.
├─ Root navigation and governance
├─ docs/                # Human-readable project documentation
├─ scores/              # MuseScore and printable score deliverables
├─ audio/               # Practice and presentation audio
├─ references/          # Curated source material and links
├─ assets/              # Project branding and shared visual assets
├─ scripts/             # Project utilities and validation
├─ reports/             # Generated reports
├─ tasks/               # Active work tracking
└─ archive/             # Superseded material
```

2.3 Root Document Responsibilities

2.3.1 README.md (*Project README (GitHub repository root)*)

Concise public landing page. It explains the project and directs readers to PROJECT_INDEX.md (*Project Index (GitHub repository root)*).

2.3.2 PROJECT_INDEX.md (*Project Index (GitHub repository root)*)

Authoritative navigation hub for all project documentation and deliverables.

2.3.3 PROJECT_CHARTER.md (*Project Charter (GitHub repository root; not in PDF manual)*)

Defines purpose, scope, stakeholders, constraints, and success criteria.

2.3.4 Philippine Marching Percussion Identity Framework (Specifications)

The project's musical constitution. Defines identity, cultural foundations, and the **Identity Preservation Checklist (Specifications)**.

2.3.5 ENGINEERING_DOCUMENTATION_FRAMEWORK.md (*not included in PDF manual; see project repository*)

Records how EDF applies to this special-purpose project.

2.3.6 ARCHITECTURE_DECISIONS.md (*not included in PDF manual; see project repository*)

Indexes project ADRs.

2.3.7 CHANGELOG.md (*not included in PDF manual; see project repository*)

Records significant structural and documentation changes.

2.4 Documentation Domains

2.4.1 docs/Architecture/

Project structure, documentation architecture, cross-cutting design, and ADRs.

2.4.2 docs/Specifications/ (Specifications)

Authoritative statements of project intent, required behavior, design constraints, notation rules, and musical requirements.

Primary documents:

- **Philippine Marching Percussion Identity Framework (Specifications)** — musical constitution
- **Core Blueprint (Specifications)** — operational blueprint

- [Design Principles \(Specifications\)](#)
- [Notation Standards \(Specifications\)](#)

2.4.3 docs/Reference/ (Reference)

Definitions, terminology, concept explanations, and stable reference material. See the [Concept Library \(Reference\)](#) for mature concept definitions.

2.4.4 docs/User_Guides/ (User Guides)

Practical instructions for arrangers, educators, performers, and other end users.

Primary documents:

- [Instructor Introduction \(User Guides\)](#) — first read for music educators and pilot collaborators
- [MONHS 2026 Pilot Brief \(User Guides\)](#) — Misamis Oriental National High School (MONHS) pilot
- [Educational Handbook \(User Guides\)](#) — teaching methodology
- [Arranging Guide \(User Guides\)](#) — arranging guidance

2.4.5 docs/Development/ (AI and Development)

Project-building workflow, experiments, internal working methods, and the [Project Journal \(AI and Development\)](#).

2.4.6 docs/Governance/ (Governance)

Project-specific governance guidance when it becomes necessary.

2.4.7 docs/Templates/ (Templates and EDF Placeholders)

Reusable document and teaching-material templates.

2.4.8 docs/Research/ (Research)

Research notes, source evaluations, cultural studies, and analysis derived from external materials.

2.5 Deliverable Areas

2.5.1 scores/ (*Scores overview (repository scores/)*)

MuseScore files, PDFs, and score-related documentation.

2.5.2 audio/ (*Audio deliverables (repository audio/)*)

Full mixes, sectional practice tracks, and approved exports.

2.5.3 references/ (*Project README (GitHub repository root)*)

Curated recordings, links, media notes, and inspiration sources. Large copyrighted media should not be committed unless redistribution is permitted.

2.5.4 assets/ (*Project README (GitHub repository root)*)

Canonical project branding and shared visual assets (for example the primary logo). See Assets README (*Project README (GitHub repository root)*).

2.6 Information Lifecycle

1. Research (Research) or observation
2. Development (AI and Development) note or Project Journal (AI and Development)
3. Concept Library (Reference) or Specification (Specifications)
4. Arranging (User Guides) or educational (User Guides) guidance
5. Score (*Scores overview (repository scores/)*) and audio (*Audio deliverables (repository audio/)*) deliverable
6. Field testing
7. Revision or archival (*Project README (GitHub repository root)*)

2.7 Placement Rules

- Vision and required outcomes belong in Specifications (Specifications).
- Stable definitions belong in Reference (Reference).
- Practical how-to guidance belongs in User Guides (User Guides).
- Experiments and provisional observations belong in Development (AI and Development).

- Structural decisions belong in [Architecture](#).
- External-source analysis belongs in [Research \(Research\)](#).
- Finished music belongs in scores/ (*Scores overview (repository scores/)*).
- Finished practice audio belongs in audio/ (*Audio deliverables (repository audio/)*).
- Canonical branding and shared visual assets belong in assets/ (*Project README (GitHub repository root)*).
- Superseded material belongs in archive/ (*Project README (GitHub repository root)*).

2.8 Navigation Rules

Every user-facing Markdown document should link upward through the documentation hierarchy. Domain README files provide local navigation, while PROJECT_INDEX.md (*Project Index (GitHub repository root)*) remains the master index.

2.9 Migration Rule

Information should have one canonical home. During migration, old paths must be explicitly listed for removal after the replacement files have been verified.

3 Architecture Decision Records

Project-specific architectural decisions are stored here.

Use sequential names:

ADR-0001-Short-Decision-Title.md

ADR-0002-Short-Decision-Title.md

Update the root Architecture Decision Index (*not included in PDF manual; see project repository*) whenever an ADR is added or changes status.
